Visualization

ESP provides a holistic, visual view of what is happening in every step of your logistics journey through a simple dashboard.

Real-time location tracking

52 °N, 13 °E

Frequent bottlenecks at crossing, route to overpass

Bad weather up ahead:
New ETA: 2:30pm

See all assets on visual map

And more.....

Time & Space Network

Imagine having all past and real-time data and the factors that affect your operation at your fingertips. Based on all those conditions, get the best strategies in the blink of an eye through our Time & Space Network in one dashboard.

One Dashboard

Past & Real-time
information

+

+

Provides quick real-time strategies

Insightful Data

ESP not only helps you get data, but helps you understand each point, suggests which ones are relevant, and helps formulate strategies.

- ✓ Route A: New paved roads and gas station available near time truck needs refueling

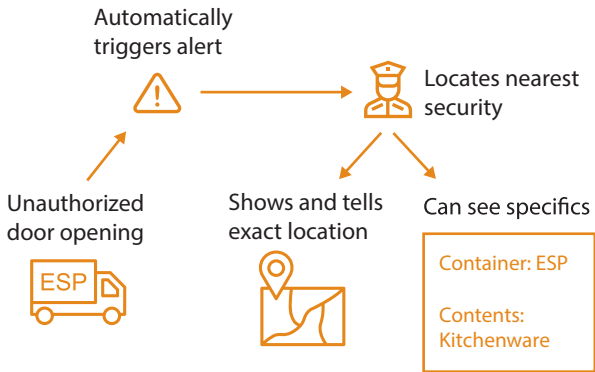

- ✗ Route B: Busy railroad crossing and prone to fires at this time of the month

And more.....

Security & Monitoring

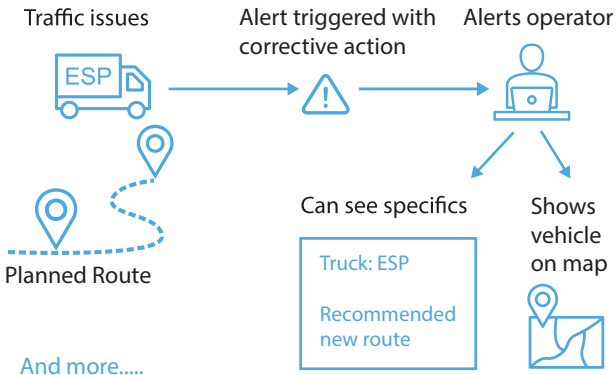

Stolen and lost goods from containers cost billions each year. One way ESP solves this is through timely alerts to security when an exception happens.

And more.....

Alerting & Notifications

Improper positioning of assets can be a major problem and it can be hard to take corrective action once that happens. ESP provides advanced notice of issues so you can take corrective action quickly.
